# CURDZ

## ✔ WHITE CHEESE (THE WHITE X UK CHEESE)

Another one checking all boxes for the connoisseur of gas and OG Kush hybrids; this unique and rare cross of UK Cheese and The White has no problem boasting characteristics of both parents. Her dense resin covered knots yield a wet greasy oil slick completely reminiscent to many elite OG Kush and Sour Diesel trichomes. The UK Cheese notes are very subtle due to the high concentration of overwhelming exotic gassy Kush terps (10 identified to be exact), but evident for those with experienced palettes. Cheese brings subtle nuances detectable in the overall nose these buds permeate from the bag, which can only be described as a soft cream behind all the raging exotic fuel. Her flowers ripen to a rich velvety purple and she boasts high concentrations of CBGa as well for that heavy medicated feeling.

# GARLIC & ORANGE JUICE

## ✔ GARLIC COCKTAIL #7 (GMO X MIMOSA)

Thank you @uprisingseed, this weed is ridiculously loud and beautiful to cultivate. Her aromas are purely citrus, but in a nuanced soft undertone type of way. Flavors of orange-ade and pomelo are evident throughout her blooming cycle, but the physical formation of flowers is a perfect rendition of GMO on “roid rage”. Definitely a mind-blower for GMO fanatics, but replacing the rank dumpster, garlicky trash terps for an orange grove; still just as offensive and will take out the room when you expose the bag. The flowers from this plant are taken full-term every time and allowed to ripen when she wants; 10 weeks to be exact, but well worth the efforts and wait. Her trichomes mature physically larger than most other varieties we grow and coat the bracts, calyxes and fans leaving virtually no surface area untouched. The buzz as you would expect from this and most citrus strains is uplifting and alertness; but the GMO brings a heavy and long lasting effect which is obviously great.

# PINE CONEZ

## ✔ LA KUSH

True OG and nothing more than the real deal period.

For us, there is nothing purer, more iconic or more classic than this cut to define what OG Kush is truly about. Gasoline-soaked tennis balls and spruce cloud your senses with her addictive trademark aroma guaranteed to turn heads every time you crack the jar. This is a house favorite simply because she represents dank cannabis before all the glitz and glam hit the scene.

She may not have the look like some, but she does the trick every time. Her trichomes create a sticky, greasy sheen that permeates the surrounding atmosphere and gums up any surface her buds come in physical contact with. As complete connoisseurs of gas varieties, we cataloged dozens of “OG Kush” cuts and consolidated down to what we consider the perfect cut.

Her flowers are golf ball in size but makeup for it in density far outweighing most huge cola growing varieties we’ve grown. If you want the best expression of OG, this buds for you!

# GHETTOPINESOL

## ☑ AKA FABULOSO

Homage to the creator @arghkade for this one. We are extremely thankful to be able to have the opportunity to cultivate this on a small-scale top-tier quality control batch system allowing us to push her full potential. Those who are lucky enough to grab some of this herb or hash will understand the hype once their lungs feel the pressure from this hybrid. Throughout her maturation, strong aromas of Big League Grape Bubble Gum perfume the canopy eventually bringing out a gassy background as she nears harvest. This bud is likely to remind you of some straight old school but will contend with anything in a true connoisseur's library in our opinion adding opposite spectrums of present day cannabis to the menu. She is full of character and dripping with some of the most exotic trichomes we've seen on cannabis to date; no wonder the hash is so renown.

# CALIRADO CAKE

## ✔ AKA ICE CREAM CAKE (WEDDING CAKE X GELATO 33)

So many elite variations of this genetic exist in today's market and all of them boast dank and properties with subtle nuance and variances depending on which cut you have. Regardless, the work done by @seedjunky\_jbeezy and the mark left on west coast and global cannabis today is nothing short of exceptional. Our selection of Ice Cream Cake leans heavy to the Gelato side of the parental lineage. The trademark musky dank terpene profile is just as offensive in an opposite way as any harsh citrus or limonene heavy strain. The resin permeates everything if the plant is physically disturbed and almost reminds you of some type of exotic chocolate it's so rich. COATED with glistening greasy trichomes and deep purple calyxes for that perfect bag appeal. Grab a bag to enjoy with any of your Cali friends or family and you're sure to give them a taste of home. Heads up, this weed is strong.
